NOVOCORE®

Get the look and feel of premium hardwood with NovoCore's exceptional vinyl floors that are designed to be superior, safe, and sustainable.

The Optimum Hybrid Collection

Character, warmth, and natural beauty come together in the Optimum collection!

This vinyl collection is water-resistant, scratch-resistant, and slip-resistant. It also comes with a pre-attached sound-absorbing pad that can minimize noise. With a 5.5 mm overall thickness and a durable 0.5 mm wear layer, each plank is extremely durable, making it perfect for both residential and commercial applications.

The Look and Feel of Real Hardwood

Each plank features a natural wood grain surface and a four-sided enhanced bevel. Choose from a wide range of colors and designs that will fit your style!

WARRANTY	Residential – 25 years Light Commercial – 5 years

PERFORMANCE AND SAFETY

NovoCore floors are developed with the idea that people walk, breathe, and live every day on their floor. Each collection is recyclable and completely free of ortho-phthalates and other harmful plasticizers.

GREENGUARD GOLD · Ortho Phthalate Free · ASSURE CERTIFIED

On top of its many advantages, NovoCore floors are also **GreenGuard Gold™ Certified** and **ASSURE CERTIFIED™** guaranteeing that it has been manufactured to the highest standards and meets all the requirements for indoor air quality and rigorous performance, and are safe for use in any environment.

SE+® Anti-microbial Surface

SE+® Anti-Microbial Finish

Standard cleaning methods may kill microbes but may not provide protection against residual or recurrent contamination. With SE+®, the survival of microbes is inhibited. The SE+® particles compromise the integrity of a microbe's cell membrane, leading to its deactivation. Indeed, it is the best way to provide long-term floor protection!

ScratchShield MAX™ Finish

Scratch Shield MAX™ Finish

With the ScratchShield MAX™ Finish, these floors have the ultimate protection against scuffs, scratches, and stains. It is also meant to be perfect for taking on impacts and can surely endure extensive wear!

INSTALLATION IN A FEW CLICKS

Installing NovoCore floors is quite easy. The simple click system, the pre-attached backing, and the handy length of each plank ensure that you can work quickly and efficiently, with little to no mess!

Preparation is key! Before you start:

1.) NovoCore floors can be installed even in large areas of up to 400m2.

2.) Make sure the surface is clean, dry, flat, and structurally sound. NovoCore floors can be installed over most hard surfaces.

3.) Place a 0.15 mm poly-film moisture barrier.

4.) Acclimation and an additional underlay are not needed. As each plank comes with a pre-attached backing, additional underlay is unnecessary. Adding an additional underlay will void the warranty.

5.) Leave at least 10mm expansion gaps in the perimeter.
