

SHEFFIELD

Stainless Steel Kettle

Stainless steel kettles are popular due to their durability, corrosion resistance, and sleek appearance. The 1.7l capacity is suitable for boiling water for multiple cups of tea, coffee, or other hot beverages. The kettle's electric heating element quickly heats the water, providing a fast and efficient boiling process.

360° Rotational base

The 360-degree rotational base allows the kettle to be placed back on the base from any angle.

Operation indicator light

The kettle is equipped with an indicator light that lets you know when the kettle is switched on or off.

Safety Locking lid

A safety locking lid is an added safety feature to prevent accidents or spills while boiling water.

- 1.7l capacity
- Safety locking lid
- Automatic switch off
- Concealed heating element
- 360 Degree base
- Stainless steel finish

Model: PLA0419
