Addressed Mail Only Thank You label
Online key replacement service www.boxdesign.co.nz
Optional padlock receptive lock for parcel drop
Complete lock and door replacement service

For the best results we recommend using a qualified builder or professional installer.

Installation Instructions

1. Hold the letterbox against your fence or wall to find the best position. NZ Post recommends the posting slot is 900mm to 1200mm from the ground.
2. Position the letterbox so the door hinge point can move freely. We recommend a clearance of 30mm either side of the letterbox when installing several letterboxes together.
3. Lift the door of the letterbox to mark the holes onto the fence, then pre-drill the wall or fence behind.
4. Use the supplied stainless-steel fixings to attach the letterbox using a square drive bit or screwdriver. Specific fixings may be needed if you are attaching to stonework, steel or concrete.

Cleaning and Care

We recommend cleaning your letterbox regularly with warm soapy water.

To remove any stubborn marks, use a soft cloth and methylated spirits.

If the lock is left unused for some time, spray a lubricant like WD40 or CRC down the lock barrel, then push your letterbox key in and out of the lock several times.
